May 4, 1996

Dear Harold,

What is your opinion about the "disappearance" of William Colby? Did the CIA or one of the other organs of the Military-Industrial Complex kill him? Was he on the verge of going public with something startling? Like the JFK murder?

While I'm writing, I want to ask you why Bud would never put you on his "Committee to Investigate Assassinations." I asked him numerous times, but never got a real answer.

Best wishes,

Harold

P.S. I've heard lots from other CIA people – i.e., that he was telling "outsiders" everything. But the whole damn place is leaking like a sieve. After 50 years, even names of their "deepest" agents are flowing out like water. Killing him won't stop the inevitable.
